

Healthcare

Fineline is heavily invested in serving healthcare-related organizations, creating efficiencies, quality products, and data security.

We Understand

Fineline has a long history of partnering with healthcare companies. We understand the pressures to be efficient in your administration and purchasing but also to offer top quality service to your patients and customers. We also know that your business relies on your reputation and the expertise of your staff.

Data Security and Programming Support

We have a wealth of experience working with clients in regulated industries with data privacy requirements. We adhere to the strictest of privacy and security regulations and are HIPAA certified.

And, our data programming team is well-versed at integrating with ERP data streams and automating the workflows—in a highly secure environment. Your involvement is minimized in “non-value-add” functions, as we make our operations an extension of yours.

Efficiencies and Quality Control

Our niche in printing high volumes of multi-versioned materials that require personalized information makes us a great fit for many healthcare organizations. In particular, healthcare companies—often with multiple locations—embrace our state-of-the-art Fineline™ print-on-demand and document management system. Fineline allows access anywhere, any time.

Fineline also helps you manage your visual communications via custom data portals and workflows. You realize a variety of cost-savings with our just-in-time production of materials. We help you eliminate obsolete inventories and provide accurate, targeted content as needed.
